EDUCATION

Arizona State University

Bachelor of Science in Computer Science; GPA - 3.50

Tempe, AZ

Aug. 2020 – May 2024

PROJECTS

Simulated Market Maker

Nov. 2022 - Dec. 2022

- * Developed a simulated Market Maker in C++ to take in buy and sell orders for different equities as they arrive.
- * Executed trades as quickly as possible by maintaining an order book to match buyers and sellers.
- * Charge commissions while maintaining different market statistics (median, volume, volume weighted average price) for all equities and participants.

Movie Ratings Guide

Spring 2022

- * REACT and BOOTSTRAP GUI application that takes user input and returns a list of movies, from over 10,000 possible results, tailored to user specification.
- * Using AXIOS in REACT the application fetches a list of movies from MDBLIST API and displays it once it's rendered.
- * Once a desired movie is selected, AXIOS makes another get request to display various critic ratings about the desired film.

Crypto Tracker

Spring 2022

- * Developed a real-time Cryptocurrency tracker application using JAVASCRIPT.
- * With a desired ticker for a currency, the application makes a fetch request to COINPAPRIKA API and returns up to date information for over 2,000 coins and tokens.

Restaurant Application

Spring 2022

- * Lead a University project developed a GUI full-stack application in Java and JavaFX.
- * Developed a user database in MySQL with Java to store user information.
- * Designed and coded components in an agile environment.

EXPERIENCE

Meteor Studio at Arizona State
